Our Vision | *Better structured data*

Distruption Feed

Disrup helps companies to accurately capture, manage and visualise operational data in the railway industry. Our simple web-based platform allows our clients to seamlessly integrate all aspects of data including planned and real time disruptions of trains. The disrupt system is modular, which means you can build a single integrated system to manage your data today and incrementally add products to handle other areas in the future.

LOGOTYPE - IMPACT

<h1 .oneline> Font we are using for writing a copy! One liner! (courier New) – regular 36px </h1>

<h1>Heading of the section - Lato - bold- 600 - 28px</h1>

<h1>Heading - Lato - italic light - 400 - 28px</h1>

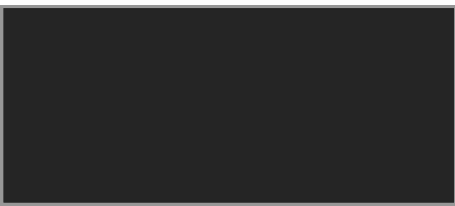

<h2>Subheading of the section-Lato Regular - 400 - 24px</h2>

<p>Paragraph - Lato - regular - 18px This is something we should consider in current rail industry
Otherwise we are trying to solve a solution which will never
be useful for our society. As always there are going to be problems
which can cause more and more disruption, however there is no
reason why we shouldn't try to encourage these.</p>
